

# Software Engineer (Frontend) Test

## Description

You need to use React to complete the following tasks. If you are unsure about the question, feel free to make all the necessary UI behavior assumptions and state them in a separate document.

Your answer will be evaluated based on:

- Feature completeness
- Code readability (naming convention, comments, etc)
- Web Standards compliance
- Code reusability and extendibility
- Compatible with different display resolution of clients
- Appropriate user interface style and experience

## Task

Please refer to the following mockup to implement page “Today’s Weather”.

### Today's Weather

City:  Country:

Johor, MY

## Clouds

Description: scattered clouds  
Temperature: 303.15°C ~ 306.15°C  
Humidity: 58%  
Time: 2021-03-16 03:15 PM

### Search History

1. Johor, MY	03:15:02 PM		
2. Osaka, JP	03:14:59 PM		
3. Seoul, KR	03:14:50 PM		
4. Tokusan-ri, KR	03:14:25 PM		
5. Taipei, TW	03:14:16 PM		
6. Tokyo, JP	03:14:12 PM		
7. Singapore, SG	03:13:57 PM		

You can set appropriate styles on your own when implementation.

## Requirements

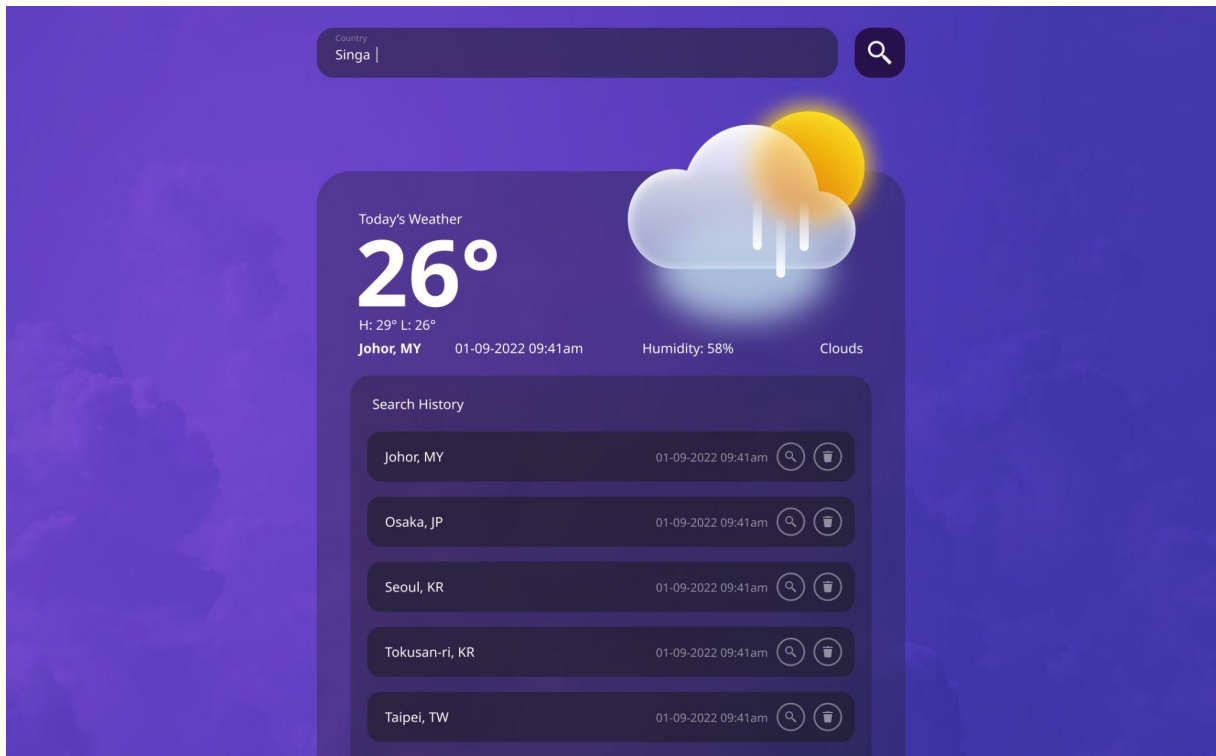

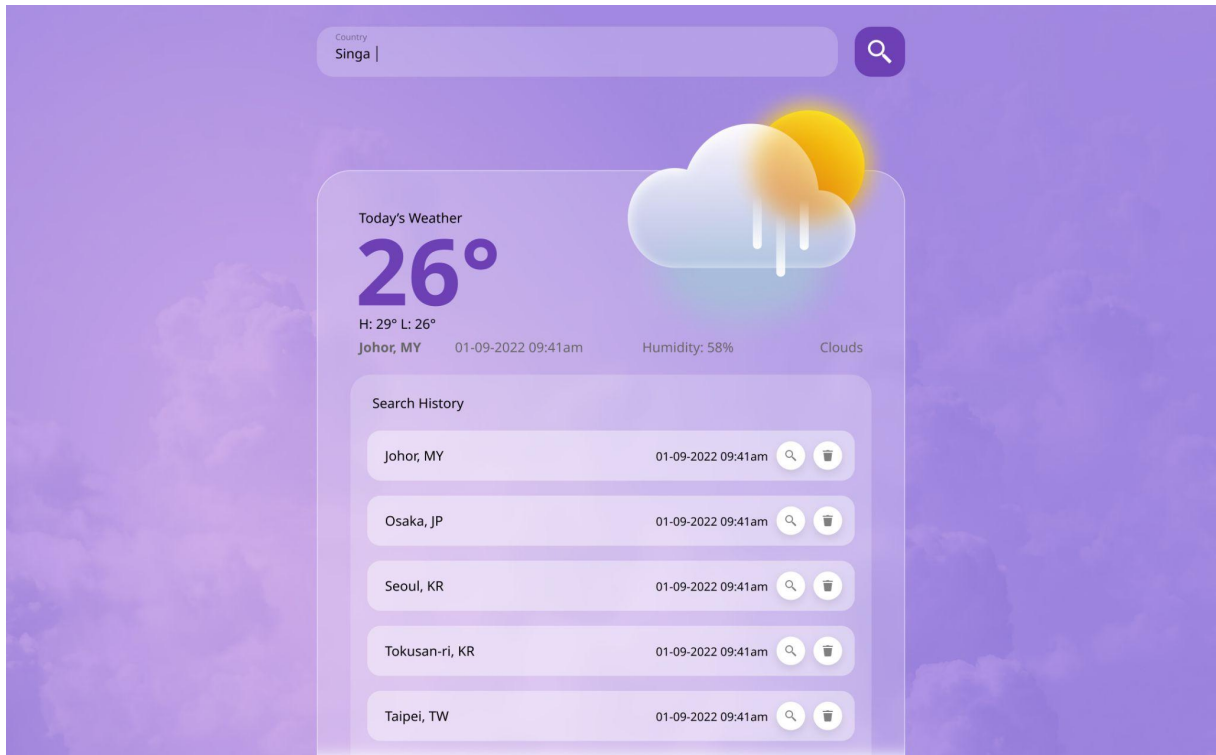

1. Display information at least based on mock up UI.
2. User can input city and country name to get weather information and display them on UI. Please use AJAX to get weather information from OpenWeatherAPI(<https://openweathermap.org/api>).
3. User can find their records in search history, and can click search button to call api again. Can click delete button to remove the record.
4. If user inputs invalid city or country name, show appropriate message on UI.

The mockup UI is contained within a rounded rectangle. At the top, the heading "Today's Weather" is followed by a horizontal line. Below this line, there are two input fields: "City:" with the placeholder text "xxx" and "Country:". To the right of these fields are two buttons labeled "Search" and "Clear". Below the input fields is a red rectangular box containing the text "Not found". Further down, the heading "Search History" is followed by another horizontal line. At the bottom of the section, the text "No Record" is centered.

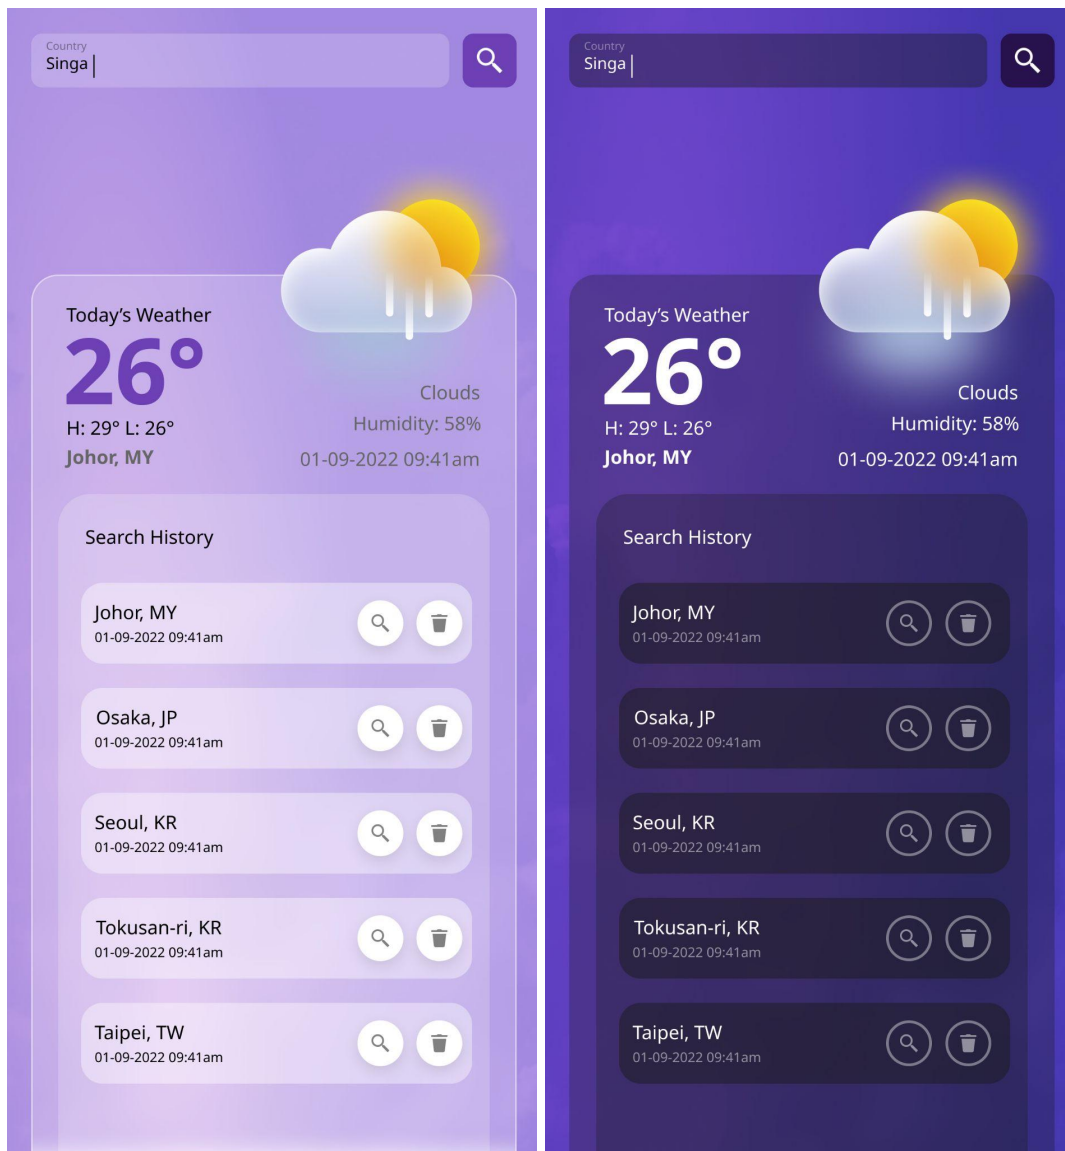

5. You may choose to build either dark or light mock up based on your own preference.
6. Optional: You may build both theme with a theme switcher

# Sample Mock Up

## Desktop

## Mobile
